CHAPTER 1

INTRODUCTION

The Perfect guide to Win Lotto Daily

You may ask what is **Lotto**? and why are so many people eager to win. Lotto is a game offer by lottery operators and regulated by gaming authorities to ensure fairness in draws, lotto game tends to draw 3, 4, 5 or six numbers from a set of numbers and promises huge reward for players. There are a lot of lotto game system that exist but in west africa the **590 lottery system** seem to be the major lottery system adopted, were five(5) balls is drawn from ninety(90) balls without repetition and players are expected to pick atleast two correct numbers to win. The next question might be, how then do i know which of these ball number(s) to pick to win? or you are probably wondering, if a lottery number ball has memory and if there is anything like lotto keys that can tell the next winning ball to be drawn.

The answer is YES! there are systemic patterns and timing keys that suggest that the lottery ball may have a memory and timing keys that has been seen to consistently unlocked winning number(s), that can't be mere coincidence.

So you might have seen yourself countless of time, dreaming of winning the lottery and what your life would be like after a big winning.

These dreams are what inspired me to write this book. But this book is not about fantasies or imagination. It about helping you, make that dream of winning the lottery a reality. Over the past 12 years i have analyzed the lottery algorithm and found out that the lottery system has a complex algorithm, and uses set of mathematical modeled keys to generate the next winning numbers in the absence of fraud.

It is a known fact that for the 590 lottery system the odds of picking two winning numbers (2 Sure) is 1 in 4,005 and three winning numbers (3 direct) is 1 in 117,480 with this high odds, it might seem very difficult to win a 2 sure or 3 direct Stake. But past record has shown that mathematical models has an ability to drop the odds by 60% and predict the next potential winning numbers.

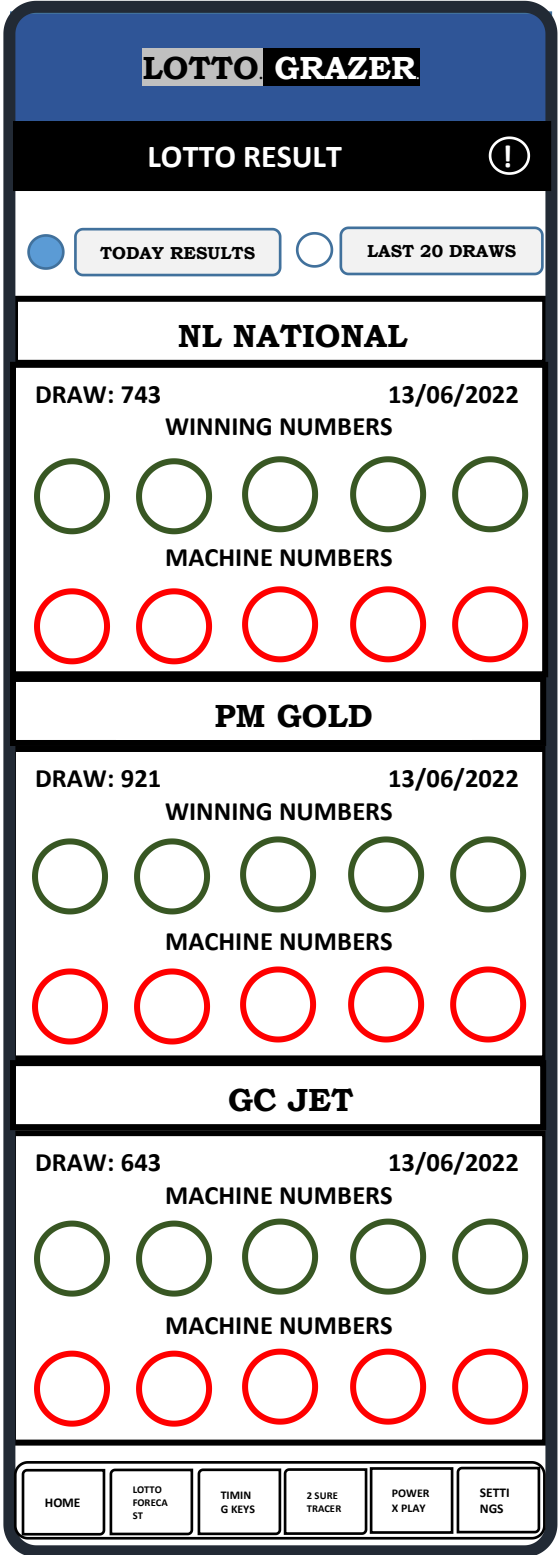

So, in this book i have tried to, showcase the 590 Lottery system Plans, Keys and projected Numbers you can use, over and over again, to win the lottery daily.

It covers on its board plans and across board plans on the 590 Lottery System, for a 3, 4 and 5 times plans. It explores the 590 lottery past winning number chart, lottery system to deliver it winning numbers, and how to use the lottery system to win the lottery system.

Progressive Number Keys are potential lotto keys generated by using a plan pattern that transform draw numbers in two events to Sign Code.this is done,by checking if the next box ball value is greater or lesser than the one before it,(e.g if the value in box 1 is lesser than that in box2 ~ sign code is **Positive(+)** , but if the value in box1 is greater than that in box2 then the sign code is **negative(-)**, if same the sign code is a **dot(.)** These sign codes are then used to decipher timing keys,that is likely to be used by the lottery system to drop its next winning numbers.

!

Ball Spacing Keys are potential lotto keys generated by using a plan pattern that find the difference between,the balls of the winning numbers horizontally from left to right ([1-2],[2-3],[3-4],[4-5]), or vertically from top to bottom,([1-1],[2-2], [3-3],[4-4],[5-5]) to decipher timing keys,that is likely to be used by the lottery system to drop its next winning numbers.

Pivoted Number Keys are potential lotto keys generated by using a plan pattern, that find three numbers in the winning draws of two events at any position, this is done by either picking **two(2)** numbers from the first event and **one(1)** from the second event or picking **one(1)** number from the first event and **two(2)** from the second event, to decipher timing keys,that is likely to be used by the lottery system to drop its winning numbers.

Constant Number Keys are potential lotto keys generated by using a plan pattern that find a ball number at a particular position in the winning draw of a given event, this is used to decipher timing keys,that is likely to be used by the lottery system to drop its winning numbers.

Sequential Number Keys are potential lotto keys generated by using a plan pattern,that arranges the five(5)winning number(s) of a give event base on their value, to get a verification code,this code is then used to decipher timing keys,that is likely to be used by the lottery system to drop its next winning numbers.

be used by the lottery system to drop its winning numbers.

HOW TO PLAY

Power X play is a platform, exclusively for lotto forecasters. The platform is aim at bringing the best lotto forecasters banker for a lottery game to enhance a sure winning.

A team on the powerX play platform c an be formed by 5 member called the **Power5** or by 7 members called the **Power7** or by 10 members called the **Power10**. Each forecaster is entitle to join any lotto game team with one sure number for their preferred lotto game they have duly forecasted. This give each forecaster paticipating an edge over the lottery.

As a forecaster, you can choose between three lottery games, National Lottery Games(Ghana),Premier lotto Games and the goldenchance lotto games. Within this lottery systems, a forecaster can pick a lotto game to join.

There is an option for a forecaster to join any of the Power team of its choice(Power5,Power7 and Power10), by providing one sure banker for the choice of game picked and a fixed amount (# 500 or 7ghc) is deducted from their wallet, to facilitate participation in that team.

Once a team is fill up, it is processed and all numbers compiled from members of a team are display to them exactly 1hour to close of game, this will enable members of a team take note of numbers forecasted before the realease of that game result and also enable them to stake on this numbers to earn even more.

Note that only 1 banker can be contributed to a team by a forecaster,intending to join a team.
