

HOW TO PLAY

Power X play is a platform, exclusively for lotto forecasters. The platform is aimed at bringing the best lotto forecasters together for a lottery game to enhance a sure winning.

A team on the powerX play platform can be formed by 5 members called the **Power5** or by 7 members called the **Power7** or by 10 members called the **Power10**. Each forecaster is entitled to join any lotto game team with one sure number for their preferred lotto game they have duly forecasted. This gives each forecaster participating an edge over the lottery.

As a forecaster, you can choose between three lottery games, National Lottery Games (Ghana), Premier lotto Games and the Golden Chance lotto games. Within this lottery system, a forecaster can pick a lotto game to join.

There is an option for a forecaster to join any of the Power team of its choice (Power5, Power7 and Power10), by providing one sure banker for the choice of game picked and a fixed amount (# 500 or 7ghc) is deducted from their wallet, to facilitate participation in that team.

Once a team is filled up, it is processed and all numbers compiled from members of a team are displayed to them exactly 1 hour to close of game, this will enable members of a team take note of numbers forecasted before the release of that game result and also enable them to stake on these numbers to earn even more.

Note that only 1 banker can be contributed to a team by a forecaster, intending to join a team.

Benefit of PowerXplay Platform

PowerXplay provides every lotto forecaster the ability to leverage their stake and optimise their winnings, as a forecaster on PowerXplay you

earn a cash rewards when your banker wins and even more when your team wins.
